# Devoted to the Future of Our Students and Our Region.

**Carlow University is devoted to developing a new generation of ethical leaders. This fall, we launched seven new programs to address shortages in the workforce.**

## Practical Nurse Certificate

In just 16 months, students can complete Carlow University's Practical Nurse Certificate Program -- an immersive nursing and clinical education experience -- and be an essential member of the care team providing compassionate, patient-centered healthcare.

## Neurodiagnostic Technology

Carlow University's AS in Neurodiagnostic Technology program is the only one of its kind in the Pittsburgh region. In just two years, our curriculum provides you with a degree in this high-demand health sciences field and prepares you to sit for the ABRET (American Board of Registration of Electroencephalographic and Evoked Potential Technologists, Inc.) certification exam.

## Surgical Technology

Carlow University has partnered with UPMC to offer the region's only University-level Surgical Technology Program of its kind. In just 20 months, you will gain the knowledge and hands-on heart, vascular and orthopedic surgery training to become a valued member of any surgical care team.

## Esports Business Management

Carlow University's Esports Business Management program is designed to help build your business, management and financial knowledge through an esports lens, while strengthening critical thinking, problem-solving and communications skills. Earn your Bachelor of Science degree online or in person, and open the possibilities to a well-paying, high demand career in esports.

## Quality Control and Assurance

Carlow University's Quality Control and Assurance Graduate Certificate program helps you step up to a meaningful role in this innovative health sciences industry in as few as 8 months. This fully online program combines a keen understanding of therapeutic and medical product development with savvy business and supply chain management insight. The result is a comprehensive education and knowledge base that medical industry leaders are looking for to help bring new and exciting technologies to market right now.

## Computer Science

Carlow University offers a personalized, hands-on learning environment to help every student find and excel in their chosen area of computer science. Our curriculum is Google-certified and designed to provide practical, in-demand programming skills to make you a top professional in today's tech workforce.

## Physical Therapy

Carlow University's Doctor of Physical Therapy degree program develops evidence-informed, critically thinking, skilled practitioners and leaders who serve the therapeutic needs of their communities with empathy and compassion. We emphasize three key elements of healthcare practice: The heart (professional formation/responsibilities), the head (cognitive knowledge), and the hand (clinical skills).

# Leading Change to Improve Pennsylvania's Future.

**The case for reducing the minimum requirement for a bachelor's degree to 90 credits.**

Carlow University leadership and educators recognize the far-reaching positive impact of higher education at the individual and community levels. We see opportunities to expand access and affordability to a life-changing degree for more of Pennsylvania's young people and continuing students.

By reducing elective credits and concentrating the curriculum—students could complete a bachelor's degree in as few as 90 credits. These valuable degree programs may include Education, Public Health, Health Care Management, Health Care Data Analytics, Creative Writing, and English.

We urge you, our state government leaders, to consider the economic and societal advantages of introducing new legislation that would amend Pennsylvania law, reducing the minimum requirement for a bachelor's degree from 120 to 90 credits.

Let's work together toward a **bright future** for the people of Pennsylvania.
