

Devoted to Educating the Leaders of Tomorrow

The Campus Laboratory School (CLS) of Carlow University offers a distinctive educational opportunity for children from preschool to grade 8. Through our Mercy tradition of faith, love, and service, we believe in fostering intellectual curiosity and student creativity with innovative, hands-on learning, including our Early Learning Center, a full-day early educational program for children six weeks to three years that nurtures social, emotional, physical, and intellectual development. And our CLS Summer Camp, that offers students in K-5th grade the opportunity to master the art of inclusivity and compassion as they explore everything from sports to science.
